

Associations

We are proud to be associated with the following organizations:

Association of Diesel Specialists

The Association of Diesel Specialists is the worldwide diesel industry's leading trade association, dedicated to the highest level of service on diesel fuel injection and related systems. A.D.S. has over 700 corporate and individual members in the U.S., Canada, Mexico and more than 56 other countries.

The primary membership of A.D.S. consists of independent repair shops (Service Members) specializing in diesel fuel injection, governor and turbocharger service. Each Service Member is authorized by one or more of the Association's Manufacturer Members, which are original equipment (OEM) manufacturers of fuel injection equipment, governors, superchargers or turbochargers.

Other membership categories encompass manufacturers and distributors of replacement parts and allied equipment, and post-secondary schools offering programs in diesel mechanic training.

Diesel Technology Forum The Diesel Technology Forum is a non-profit educational organization dedicated to raising awareness about the economic importance and essential uses of diesel engines, highlighting the continuous improvements in fuel efficiency and emissions reductions, continuous progress to reduce the environmental impact of the existing fleet of diesel engines, and leading the way for future clean diesel technology in all applications.

Since it was founded in 2000, the Forum has emerged as a leading information source on clean diesel and energy issues, and its leadership regularly participates in legislative and regulatory deliberations, technology demonstrations, and industry and media events.
